

Information Architecture

Sitemap and customer journeys

Prepared for client review - 29 June 2026

This document explains how the prototype organises the website so customers can reach the same catalogue through different paths.

Navigation Principle

The catalogue should not depend on one perfect route. Different customers search in different ways, so the prototype gives them multiple entry points into the same product set.

A confident buyer can use Shop All. A customer who thinks by school year can start with Grades. A customer looking for value can start with Packages and Access Plans.

Primary Sitemap

- Home
- Shop / All resources
- Grades
- Grade detail pages for each grade
- Packages, currently shown in parts of the prototype as Bundles & access plans
- Product detail pages
- Cart
- Checkout
- Customer Account
- Order history
- Order detail and downloads
- Help
- Contact
- About
- Privacy Policy, Terms, and Refund Policy
- Login and Sign-up

Main Access Points

- Shop All: the full catalogue with search and filters.
- Grades: a simpler click-through journey for customers who want resources for a specific grade.
- Packages: grouped offers, including term packages, full-year packages, and access plans.
- Access Plan highlight: premium offers are shown prominently in the Shop navigation.
- Product Detail: the decision page where the customer reviews the offer and adds it to cart.

Customer Journey 1: Browse All Resources

1. Customer opens Shop / All resources.
2. Customer searches or filters by grade, term, subject, format, or type.
3. Customer opens a product detail page.
4. Customer adds the product to cart.
5. Customer checks out and downloads from their account after payment.

Customer Journey 2: Browse by Grade

1. Customer opens Grades.
2. Customer selects the relevant grade.
3. Customer sees resources for that grade and can narrow by term.
4. Customer can move to advanced filters in Shop if needed.
5. Customer opens a product or package and continues to cart.

Customer Journey 3: Browse Packages and Access Plans

1. Customer opens Packages.
2. Customer compares term packages, full-year packages, and access plans.
3. Customer opens the offer detail page to see what is included.
4. If buying an access plan, customer chooses the grade during checkout.
5. Downloads unlock from the order detail page after payment is confirmed.

Customer Journey 4: Account and Downloads

1. Customer logs in or creates an account.
2. Customer sees account details and recent orders.
3. Customer opens an order detail page.
4. If payment is complete, the available files are shown as download buttons.
5. If payment is still pending, the order page explains that downloads unlock after payment succeeds.

Pages for Review

- Does the main navigation use the correct labels?
- Is the grade-first path clear enough for non-technical customers?
- Does the Packages page explain the difference between offer types clearly?
- Should access plans be promoted more strongly in the main navigation or homepage?
- Are Help, Contact, and Account easy enough to find when a customer needs support?

Questions for Client

- Should the top navigation say Shop, All Resources, or another label?
- Should Packages have its own top-level link, or stay inside the Shop menu?
- Should each grade page show packages/access plans first, individual resources first, or both together?
- Are there customer journeys we have missed, such as teachers buying for multiple grades?
